

**CosmicKiss**

# Whitepaper Cosmic Kiss

Status: 10.11.21

## 1 Executive Summary

With Cosmic Kiss, Coinygram has created a digital currency that aligns with the interests of multiple stakeholders at once. Through its unique concept, token holders can benefit from a high appreciation potential, claim exceptional prizes, gain access to a community with exclusive content, and at the same time make a valuable contribution to charitable projects. However, the main focus of the project is to promote modern aerospace.

The token is a tribute to the "Cosmic Kiss" mission carried out by the European Space Agency (ESA). With the launch of the mission and the journey to the ISS, the first issue of the Cosmic Kiss starts through the exchange Coinygram and will be tradable on other platforms.

The Cosmic Kiss is a social token that grants access to a closed community in which exclusive content is offered. At the same time, token holders are entitled to participate in the draw for prizes. This is a permanent entitlement. The tokens are not consumed when participating in a prize draw, but remain in the possession of the token holder.

The exchange Coinygram plays a central role in the context of the Cosmic Kiss. As the issuer of the cryptocurrency, the initial sale takes place directly on the online trading platform. The same applies to trading: At the start of the project, it is immediately listed on the exchange and can be traded there.

## 2 First emission of the Cosmic Kiss token as part of the token sale.

The Cosmic Kiss is a tribute to the European Space Agency's space mission of the same name, which sees Dr. Matthias Josef Maurer embark on his mission to the International Space Station (ISS). The emission of the tokens is linked to the start of his space mission. With the launch of the rocket and the mission, the official sale of the Cosmic Kiss also begins.

### **3 Emission price of the Cosmic Kiss**

The token sale starts with the launch of the mission of Dr. Matthias Josef Maurer with an emission price of 0.01 € per piece. The Cosmic Kiss can be traded on the Coinygram exchange immediately after the first emission. The emission by the emitter Coinygram takes place in firmly defined intervals. To enable a natural market mechanism, the emission price after the start of the project is based on the current market price of the Cosmic Kiss.

### **4 Circulating Supply**

The Cosmic Kiss will be emitted in a limited number. A total of 888,888,888 tokens are offered for sale by the emitter Coinygram. The amount of tokens in circulation cannot be increased subsequently. A "mining" of further tokens as well as a "minting" of the Cosmic Kiss is not possible. This measure, as well as the token burn described in chapter 5, serves to limit the amount in circulation and is thus intended to force the potential value increase of the Cosmic Kiss.

### **5 Limiting the token set: token burn**

The amount of Cosmic Kiss in circulation is strictly limited and cannot be increased even after the token sale has ended. In order to additionally strengthen the token's potential to increase in value, a so-called token burn is carried out.

In the course of this process, the tokens in this regard are irrevocably destroyed. This process serves to reduce the amount of cryptocurrency in circulation and thus leads to a shortage of supply.

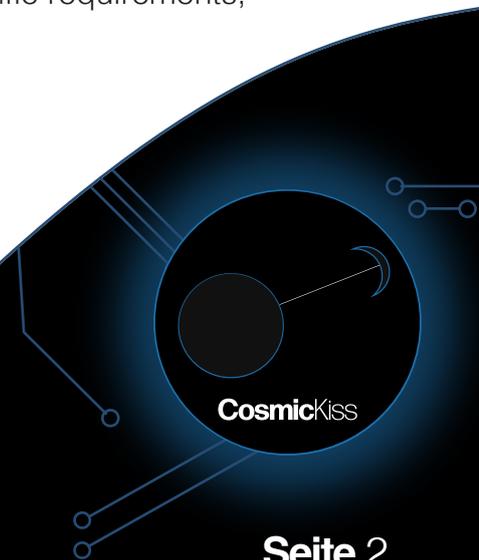

### **6 Social Token**

The Cosmic Kiss is a social token. Thus, the cryptocurrency is associated with a specific social network that will be completed in spring 2022, before the planned completion of Dr. Matthias Josef Maurer's space mission. Detailed information about the social media platform and its associated benefits are described in more detail in Chapter 9.

Access to the social media network is associated with three specific requirements, which are explained in detail below.

#### **6.1 Prerequisite: Token ownership**

Access to the Cosmic Kiss social media network requires possession of a specific quantity of tokens. Only persons who can present a minimum quantity of 1,000 Cosmic Kiss will be granted access to the social media platform. Possession must be proven on a permanent basis even after access has been granted. A sale of the Cosmic Kiss can, if the limit of 1,000 tokens is fallen below, leads to an immediate exclusion from the

network. However, access to the exclusive content and benefits of the online platform can be regained if the person in question purchases Cosmic Kiss at a later date and can thus show a sufficient amount of Tokens.

The minimum amount of tokens required for access will be adjusted in the event of a strongly positive share price development in order to also give small investors the chance to be part of the community.

## **6.2 Prerequisite: Management of tokens via Coinygram**

The proof of ownership of the Cosmic Kiss described in chapter 6.1 has to be provided on the exchange Coinygram. For this purpose, the tokens must be deposited on the wallet of the exchange. To ensure permanent proof, the transaction function of the Cosmic Kiss is deactivated on the Exchange. However, the trading process on the Exchange will not be affected by this measure.

## **6.3 Prerequisite: Active account with the Exchange Coinygram**

As a consequence of the requirements for points 7.1 and 7.2, an active account on the Exchange Coinygram is required for granting access to the social media platform of the Cosmic Kiss. The creation as well as the maintenance of such an account is not associated with any costs.

## **7 Tradability of the Cosmic Kiss**

With regard to tradability, specific requirements are associated with the Cosmic Kiss. Derived from the requirements described in chapters 7.1 to 7.3, the tradability of the Cosmic Kiss is limited to the Coinygram exchange for the time being.

At the start of the project, three trading pairs will be available on the Coinygram exchange to simplify the purchase and sale of the social token:

COSK / EUR  
COSK / BTC

## **8 Deviating trading fees**

The Cosmic Kiss is a social token, which as such is linked to a specific fee system as part of the trading process. These fees are used to finance the activities of the social media network.

The trading fees of the Cosmic Kiss amount to 2.5% of the trading volume and are

due in the trading currency facing the Cosmic Kiss. Following the trading pairs presented in Chapter 7, the payment of the trading fees is thus made in the form of Euros or Bitcoin.

The revenue generated in this way is intended to serve the entire community and is used to generate added value. Details on this are described in chapter 8.

## **9 Added Values of the Cosmic Kiss Community**

The Cosmic Kiss is a social token whose possession promises added value of various kinds. The access to the community and the associated benefits are associated with specific prerequisites, which were explained in more detail in chapter 6. The benefits provided for the Cosmic Kiss community, on the other hand, are described in the following chapters 9.1 to 9.5.

### **9.1 Social Token**

Provided that a sufficient amount of Cosmic Kiss can be proven, token holders receive access to the closed Cosmic Kiss social media network. In addition to exclusive news, numerous other contents and functions are offered with which the closed community can exchange information. Details about the network's functionality will be announced in the progress of the mission.

### **9.2 Financing of space and aviation projects**

The seed capital for Cosmic Kiss will be raised through the Exchange Coinygram as part of the initial offering. The capital acquired in this way represents the foundation for the development and expansion of the social media network. At the same time, initial investments can be made in aerospace projects.

In the context of this use of funds, the Cosmic Kiss Community focuses on a profit-oriented approach. The goal is to participate in projects that allow a high return on investment and at the same time can contribute to aerospace.

### **9.3 The Grand Prize: The Orbital Flight**

The community around the Cosmic Kiss token represents a common passion: Aerospace. It is a privilege to live in times in which technical achievements open up completely new possibilities to pursue this fascination and to experience it in real life.

We use the technical possibilities and give our community the chance to embark on a very special journey, which only a few people have dared to do so far. We are giving away a real orbital flight as a Grand Prize. Thus, the members of the Cosmic Kiss community have the chance to join one of the most exclusive clubs as an astronaut and to experience the beauty of our planet from a very special perspective.

The orbital flight will be raffled off for the year 2022 due to the very limited availability of tickets as well as the preparation time required. The winner of the Grand Prize will be drawn according to the classic lottery procedure. Tickets for the Grand Prize will be drawn monthly using an automated process. All community members will automatically receive one ticket for every 1,000 Cosmic Kiss in their portfolio on the first day of each month. The more tokens held and the longer they remain in the portfolio, the higher the chance of winning.

#### **9.4 Funding of charitable projects**

The Cosmic Kiss community is engaged in charitable purposes. Part of the revenue generated from the additional trading fees are donated to the charity project "1 Billion Meals".

All revenue generated in this way is immediately converted into Ether and stored in a specially declared wallet. In order to minimize the associated transaction costs and to reduce the administrative workload, the disbursement of the collected donations takes place at fixed intervals.

With the development of the Cosmic Kiss social media network and the launch of the platform in spring 2022, the inclusion of further charitable projects as well as a co-determination on the part of the community in the selection of the charity project is possible.

#### **9.5 Other prizes**

Separate from the Grand Prize, the Cosmic Kiss community can look forward to other prizes that are regularly raffled off among the members of the social media network. The conditions of participation for the respective competitions will be announced separately and may vary from competition to competition.

What all competitions have in common is the requirement to be part of the community. The minimum requirements for this are described in more detail in Chapter 6.

#### **9.6 Further advantages**

The added values described in chapter 9 are only the starting point for the Cosmic Kiss community. With the development of the social media platform and its launch in spring 2022, further benefits for the community will be presented.
